

ageLOC™

Time will never tell.

 NUSKIN®

SEE THE AGELOC DIFFERENCE

Now Galvanic Spa Facial Gels feature ageLOC technology—a patent-pending proprietary ingredient blend that helps diminish the negative effects related to a newly discovered source of aging. In a recent study comparing the original Galvanic gels to the new Galvanic Facial Gels with ageLOC, results demonstrate that when you slow this source of accelerated aging in the epidermis, the skin benefits are more visibly obvious.

Galvanic Spa with ageLOC—results you can see today, while promoting a more youthful appearance for years to come.

ageLOC™ IS THE DIFFERENCE. DEMONSTRATED.

At the end of the study, participants provided self-assessments on the appearance of several skin attributes. Overall, participants who used the Galvanic Facial Gels with ageLOC felt they had greater improvements in skin attributes than those using the original Galvanic gels (Figure 1).

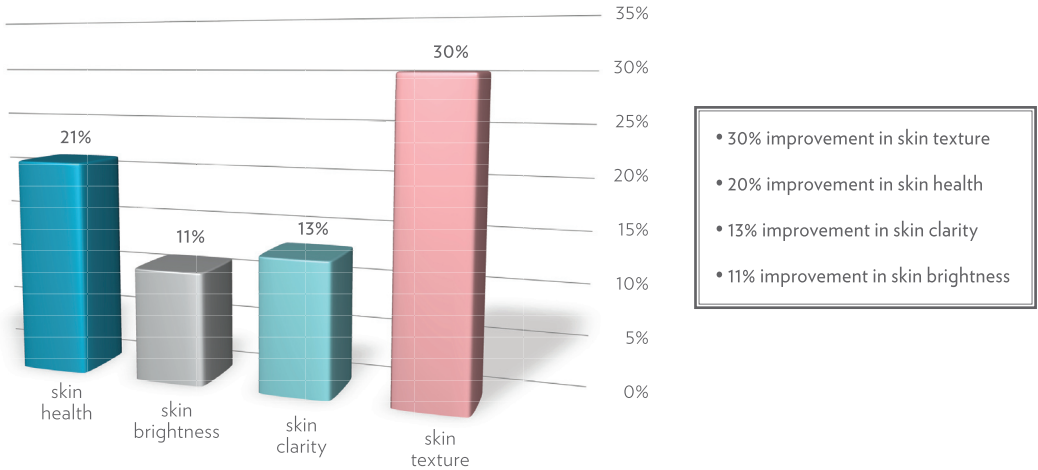

Figure 1. Percent of visible improvement of skin attributes.

SEE FOR YOURSELF

Now you can see the difference for yourself and experience a 30% improvement in the way your skin looks with the new ageLOC gels over the original gels. Order your Galvanic Facial Gels with ageLOC today for visible results now—and in the future.
